can I help them?**

ART & DESIGN

Head of Department:	Miss R Holman
Exam Board	EDUQAS
Qualification:	GCSE in Art & Design (Art, Craft and Design)

PROGRAMME OF STUDY

The course is essentially concerned with the traditional media of painting, drawing, ceramic, textile, printing and mixed media exploration. However, in keeping with developments in contemporary art practice, you are encouraged to explore a range of media and experimental approaches including digital technology to facilitate an engagement with more 'cutting edge' methods of visual expression. This is likely to involve a study and exploration of more innovative conceptual approaches to visual communication common to the expanded field of art practice today. This will also incorporate an emphasis on the value of drawing to record the creative process, interpreted through a wide range of media.

Art is a qualification that develops transferable creative skills. All students will be encouraged to:

- apply a creative approach to problem solving
- communicate personal ideas through their work
- utilise relevant art media, materials and processes to develop and express those original ideas from initiation to realisation
- research, and analyse critically, art from their own and other cultures to assist with personal progression
- acquire a command of specialist artistic vocabulary and an insight into the value and significance of art in society

HOW IS THE COURSE STRUCTURED & ASSESSED?

The course is made up of two units of work;

Unit 1: Portfolio of Work (60%); internally assessed and externally moderated.

Students must produce and submit for assessment a selection of work representative of their course of study. This must contain work in at least two different mediums and include written annotation.

Unit 2: Externally Set Task (40%); internally assessed and externally moderated.

Students produce their personal response to an exam board set task during a 10 hour supervised examination. Assessment is based on four Assessment Objectives which are designed to measure students' progress in terms of their development of knowledge and understanding. All four are equally weighted and are as follows: developing ideas through investigation of art and culture refining ideas through experimenting with media and techniques recording ideas and observations presenting a personal response

HOW CAN STUDENTS ACCESS SUPPORT?

- Revision can be accessed via Google Classroom and each student has a copy of the checklist and marksheet guide to support them.

BUSINESS STUDIES

Head of Department:	Mrs V Dougherty
Exam Board	Edexcel
Qualification:	BTEC Level 2 Technical Award in Enterprise

PROGRAMME OF STUDY

If you are looking for a career in business and want to develop skills and understanding that are directly relevant to the business world, then this qualification is for you. The BTEC Technical Award in Enterprise has been designed to accredit a candidate's achievement in a modern and practical way. The course will help build the skills, knowledge and understanding of enterprises that are needed to continue studying and to start work. You will have the opportunity to explore what it means to set up and run an enterprise, as well as develop key skills and gain an insight into the sector. The skills and experience you will gain are vital to succeed in the business environment, thereby enhancing your employability within the business sector.

HOW IS THE COURSE STRUCTURED & ASSESSED?

The qualification consists of three components that gives learners the opportunity to explore what it means to set up and run a business enterprise, as well as develop key skills and gain an insight into the sector. Components 1 and 2 are internally assessed Pearson Set Assignments and are externally moderated and Component 3 is an externally assessed exam based unit. Pearson Set Assignments (PSAs) are completed in controlled conditions, students are given preparation time to prepare for each task where they are given access to Google and lesson materials to conduct research and prepare notes to complete the task during the supervised time frame to complete each task without internet access.

Component 1 - Exploring Enterprises (Internally assessed - 30% of overall qualification)

During this component you will explore the activities enterprises undertake and the characteristics and skills of the entrepreneurs that run them. You will explore the market research methods used by enterprises and their importance in understanding customer needs and competitor behaviours. You will carry out research into the internal and external factors that affect an enterprise and how enterprises use this research to conduct a PEST and SWOT analysis to help them understand how these factors affect their enterprises

Component 2 - Planning and Presenting a Micro-Enterprise Idea (Internally assessed - 30% of overall qualification)

During this component you will generate two realistic ideas for a micro-enterprise and choose one of these to plan within a £50 budget. You will produce a business plan for your micro-business idea. You will pitch your business plan for your chosen micro-business idea and review the production and delivery of their presentation to make recommendations for improvements in the future.

Component 3 - Marketing and Finance for Enterprise (Externally assessed - 40% of overall qualification)

In the final component of the course, you will explore how marketing is used by enterprises and the factors that influence how enterprises identify and target their market. You will complete financial documents and statements and explore how to use them to monitor and improve the performance of an enterprise in order to make decisions and recommend strategies for success.

HOW CAN STUDENTS ACCESS SUPPORT?

On successful completion of this course, you may wish to study the BTEC Level 3 in Business in Sixth Form.

This is the equivalent to one A Level and will further develop and extend knowledge from previous units. Students will also have the opportunity to take on and study new topics within units. On successful completion of the BTEC Level 3 in Business, students are then eligible to apply to university to continue their studies or business related vocations.

HOW CAN STUDENTS ACCESS SUPPORT?

<https://qualifications.pearson.com/content/dam/pdf/btec-tec-awards/enterprise/2022/specification-and-sample-assessments/60370634-btec-tech-award-enterprise-2022-spec.pdf>

All classwork, homework and coursework elements are set on Google Classroom login is via Google Classroom using the students usual school login.

CHILD DEVELOPMENT

Head of Department:	Mrs L Egerton
Exam Board	OCR
Qualification:	Cambridge National in Child Development

PROGRAMME OF STUDY

This is a vocational qualification so, everything you learn about will be linked to working with children aged 0-5 years. You will develop knowledge, understanding and practical skills that are used in the childcare sector. And will give you the background knowledge and understanding for a future working with children. This is an engaging qualification and you will learn about how children develop 0-5 years, how to support the health and wellbeing of children from pre-conception right the way up to 5 years and how to create a safe environment and understand the nutritional needs of children 0-5 years.

Unit R057: Health & Wellbeing for Child Development

In this unit, students will learn about the importance of both pre-conception health and creating conditions in which a child can thrive, including the prevention and management of childhood illnesses and creating a safe environment.

Topic 1 – Pre-conception health and reproduction

Topic 2 – Antenatal care and preparation for birth

Topic 3 – Postnatal checks, postnatal care and the conditions for development

Topic 4 – Childhood illnesses and a child safe environment

Unit R058: Create a safe environment and understand the nutritional needs of children from 0-5 years

In this unit, students will learn how to create a safe environment for children from birth to five years in childcare settings. They will investigate and choose equipment that is both suitable and safe for use and will learn about their nutrition and dietary needs.

Topic 1 – Creating a safe environment in a childcare setting

Topic 2 – Choosing suitable equipment for a childcare setting

Topic 3 – Nutritional needs of children from birth to five years

Unit R059: Understand the development of a child from 0-5 years

In this unit, students will learn the expected developmental norms for children from one to five years. They will use observation, research techniques and skills to

investigate these development norms and explore their findings. Students will also learn the importance of creating plans and providing different play activities to support children in their development.

Topic 1 – Physical, Intellectual and social development norms from one to five years

Topic 2 – Stages and types of play and how play benefits development

Topic 3 – Observe the development of a child one to five years

Topic 4 – Plan and evaluate play activities for a child aged one to five years for a chosen area of development

HOW IS THE COURSE STRUCTURED & ASSESSED?

The OCR Cambridge National Technical Award in Child Development is run over two years and content is broken down into units. Each unit is worth a specific number of points and, to successfully complete the course, students must complete each unit to the required minimum standard.

Unit 1: Health and wellbeing for Child Development is externally assessed. This will be a written examination consisting of a one hour paper. You will take this in Year 11. It is worth 40% of the qualification.

Unit 2 and 3 are assessed through coursework completion and this means that there is no final written examination for these units. Each of these units has a number of assignments to complete in order to fulfil the individual unit requirements.

HOW CAN STUDENTS ACCESS SUPPORT?

- Revision can be accessed via Google Classroom and each student has a copy of the checklist and marksheet guide to support them.

COMPUTER SCIENCE

Head of Department:	Mrs V Dougherty
Exam Board	Edexcel
Qualification:	GCSE in Computer Science

PROGRAMME OF STUDY

An exciting, practical focus on real-life programming, developing skills relevant to the future. Our GCSE in Computer Science is an engaging qualification that equips students with the knowledge and practical skills to thrive in the fast-changing world of computer science. Our qualification provides a practical approach to developing computational skills. This includes innovative, practical onscreen assessment to ensure all students develop the computational skills they need for an exciting digital future beyond the classroom.

This qualification has a straightforward structure with six comprehensive topic areas including; computational thinking, data, computers, networks, and issues and impact of computing in the world today. The final topic is a practical onscreen assessment, which focuses on the ability to analyse and solve problems by designing, writing, testing and refining programs. The qualification's combination of written and practical elements balances theory and practical application, providing students with a rounded experience of computer science.

HOW IS THE COURSE STRUCTURED & ASSESSED?

The BTEC Level 2 Tech Award in Digital Information Technology is comprised of three components.

Paper 1: Principles of Computer Science

Written examination: 1 hour and 30 minutes

50% of the qualification

This paper will assess Topics 1 to 5.

- Topic 1: Computational thinking – understanding of what algorithms are, what they are used for and how they work; ability to follow, amend and write algorithms; ability to construct truth tables.
- Topic 2: Data – understanding of binary, data representation, data storage and compression.
- Topic 3: Computers – understanding of hardware and software components of

computer systems and characteristics of programming languages.

- Topic 4: Networks – understanding of computer networks and network security.
- Topic 5: Issues and impact – awareness of emerging trends in computing technologies, and the impact of computing on individuals, society and the environment, including ethical, legal and ownership issues.

Paper 2: Application of Computational Thinking

On Screen examination: 2 hours

50% of the qualification

- This paper will assess Topic 6: Problem solving with programming.
- The main focus of this paper is:
- understanding what algorithms are, what they are used for and how they work in relation to creating programs
- understanding how to decompose and analyse problems ability to read, write, refine and evaluate programs.

They will be provided with:

- coding files
- a hard copy of the question paper
- the Programming Language Subset (PLS) – as an insert in the question paper and in electronic format. Students will answer the questions onscreen using Python 3. This assessment consists of six compulsory questions.

HOW CAN STUDENTS ACCESS SUPPORT?

Students can attend after school sessions with their teacher throughout the academic year. We also aim to provide some revision sessions outside school hours when exams are approaching, this includes saturday/easter sessions and online sessions. We provide resources on Google Classroom so that students can access class work from home.

Specification: <https://tinyurl.com/y2xx9v84>

DESIGN & TECHNOLOGY

Head of Department:	Mr J Griffiths
Exam Board	AQA
Qualification:	Design Technology GCSE

PROGRAMME OF STUDY

GCSE Design and Technology will prepare students to participate confidently and successfully in an increasingly technological world. Students will gain awareness and learn from wider influences on Design and Technology including historical, social, cultural, environmental and economic factors.

Students will work creatively when designing, making and applying technical and practical expertise.

HOW IS THE COURSE STRUCTURED & ASSESSED?

This is a two year course with content broken into two main assessments.
Externally assessed examination

Section A: Core technical principles (20 marks)

A mixture of multiple choice and short answer questions assessing a breadth of technical knowledge and understanding.

Section B: Specialist technical principles (30 marks)

Several short answer questions (2–5 marks) and one extended response to assess a more in depth knowledge of technical principles.
Internally assessed controlled assessment

Section C: Designing and making principles (50 marks)

Practical application of:

- Core technical principles
- Specialist technical principles
- Designing and making principles

The controlled assessment

Non-exam assessment (NEA): 30–35 hours (100 marks) substantial design and make task. Assessment criteria:

Identifying and investigating design possibilities, producing a design brief and specification, generating design ideas, developing design ideas, realising design ideas, analysing & evaluating.

HOW CAN STUDENTS ACCESS SUPPORT?

- Students can attend after school sessions on Monday night in DT3. This is available for students to get help from teachers or to complete a piece of coursework they are currently working on.
- Resources will be posted on Google classroom on a regular basis and students can access this from home to again complete coursework or help support the current theory topic.
- Practical support will be available, in lessons and after school, when the appropriate section is reached.

Head of Department:	Mr. J Griffiths
Exam Board	WJEC
Qualification:	Level 1/2 Vocational Award in Engineering (Technical Award)

PROGRAMME OF STUDY

This qualification will develop students' knowledge and understanding of the engineering sector and provide them with opportunities to develop associated practical skills. It covers manufacturing engineering products, designing engineering products and solving engineering problems which focuses on how modern engineering has had an impact on modern day life at home, work and in society in general.

HOW IS THE COURSE STRUCTURED & ASSESSED?

The course is made up of three units. Two units are internally assessed and one that's externally assessed.

Unit 1 Manufacturing Engineering Products (40%)

Unit 1 provides learners with the opportunity to interpret different types of engineering information in order to plan how to manufacture engineering products. Learners will develop knowledge, understanding and skills in using a range of engineering tools and equipment in order to manufacture and test an end product.

Unit 2 Designing Engineering Products (40%)

Unit 2 allows learners to explore how an engineered product is adapted and improved over time, and it offers learners the opportunity to apply their knowledge and understanding to adapt an existing component, element or part of the engineering outcome that they manufactured for Unit 1

Unit 3 Solving Engineering Problems (20%)

Unit 3 introduces learners to a range of considerations that impact on engineering design and how modern engineering has had an impact on modern day life at home, work and in society in general.

Unlike previous engineering courses, this course is structured to be heavily research based with a focus on developing independent practice. Unit 1 is the only practical component.

HOW CAN STUDENTS ACCESS SUPPORT?

- Resources will be posted on Google classroom on a regular basis and students can access this from home to again complete coursework or help support the current theory topic.
- Practical support will be provided when the relevant units are completed.

Head of Department:	Miss J Hessey & Mrs L Lowe
Exam Board	Eduqas WJEC
Qualification:	GCSE in English Language, GCSE in English Literature

PROGRAMME OF STUDY

English Language: Students will study skills in Reading and Writing, studying literary and non-literary texts from the 19th Century through to the 21st Century. They will be required to show that they can write for a variety of different audiences and purposes. Students will also be assessed orally through Speaking and Listening, exploring the features of Spoken Language. Students will be required to complete one formal presentation or speech.

English Literature: Students will study Shakespeare, pre-and-post-1914 prose and drama as well as a range of poetry from 1789 to the present day.

HOW IS THE COURSE STRUCTURED & ASSESSED?

In Year 10, students will learn the key skills needed for their English Language and Literature examination. They will look at a range of 19th Century fiction and non-fiction texts and show that they can write with technical accuracy. They will practise creative writing as well as transactional writing. For Literature, students will read, study and respond to the set texts (Macbeth, An Inspector Calls, A Christmas Carol, Poetry Anthology (1789-present)).

In Year 11, students will continue to develop their GCSE English Language skills but they will also continue to study and revise their English Literature set texts.

There are two main ways that students' work is assessed:

- Externally – Both courses are linear and students sit all external examinations in both GCSE English and GCSE English Literature at the end of Year 11.
- Internally – English teachers feedback to students on their progress by marking homework, feeding back and offering supportive advice in preparation for mock and external examinations.

Staff also assess and mark Speaking and Listening performance – although an external moderator may visit to check that our standards are of the highest order.

HOW CAN STUDENTS ACCESS SUPPORT?

- Revision can be accessed via Google Classroom and each student has a copy of the checklist and marksheet guide to support them.
- <https://www.bbc.co.uk/bitesize/examspecs/zpxh82p>
- <https://www.bbc.co.uk/bitesize/examspecs/zw9mycw>

Head of Department:	Mr LeNormand
Exam Board	AQA
Qualification:	GCSE in French

PROGRAMME OF STUDY

In GCSE French, you will learn to use four main aspects of essential skills for communication in French (and, indeed, in any language): Listening, Speaking, Reading and Writing. There will be an emphasis on understanding of grammar here, too. During the course, you will cover topics within the following themes:

Identity and Culture

- Me, my family and friends
- Technology in everyday life
- Free time activities
- Customs and festivals in French speaking countries/communities Local, national,

International and global areas of interest

- Home, town, neighbourhood and region
- Social issues
- Global issues
- Travel and tourism

Current and Future Study and Employment

- My studies
- Life at school/college
- Education post-16
- Jobs, career choices and ambitions

HOW IS THE COURSE STRUCTURED & ASSESSED?

The four skill areas of Listening, Speaking, Reading and Writing are each worth 25% and are examined at the end of Year 11. Lessons will focus on each of these skill areas, building your vocabulary base and deepening your understanding and application of grammar. It will build on the skills and grammar you have learned during Key Stage 3 and develop more complex and sophisticated language.

In your French GCSE all four areas of Listening, Speaking, Reading and Writing will be assessed by separate examinations at the end of Year 11 at either foundation or higher tier.

The Listening and Reading units will require you to respond to spoken or written French demonstrating that you can understand and identify key information. In the Reading unit you will also be required to translate from English into French. The Speaking unit consists of a role play, picture based discussion and general conversation lasting from 7 to 12 minutes and will be conducted by your teacher. For the Writing unit you will answer a series of questions requiring you to demonstrate your ability to structure a response using appropriate vocabulary and a range of tenses. You will also be required to translate from French into English.

HOW CAN STUDENTS ACCESS SUPPORT?

- Students should be regularly learning vocabulary through <https://www.quizlet.com>. If there are technical issues or lack of internet access at home, students can seek help from any member of the MFL team; students can complete their learning with us in after school sessions.
- Every week there are activities posted to Google classroom including a direct link to the Quizlet learning set.
- For self study and revision of French grammar, use <https://www.languageonline.org.uk>

GEOGRAPHY

Head of Department:	Miss J New
Exam Board	Eduqas
Qualification:	GCSE in Geography

PROGRAMME OF STUDY

Geography develops students' knowledge and understanding of the world in which they live today. Topics are chosen from a range of physical and human options explored through relevant case studies in their own world and the fast changing world around them. Geography encourages students to ask questions about the world they live in, process ideas and evaluate key global issues. Geography students are given the opportunity to develop opinions, assess the reliability of evidence and communicate ideas and information in a variety of formats.

Students will have numerous opportunities to take part in extra - curricular activities within the subject, focusing on fieldwork and geographical skills. The department leads a number of field trips into different localities. This permits students to carry out primary data collection and experience elements of core Geography in a real world setting.

HOW IS THE COURSE STRUCTURED & ASSESSED?

Students will sit three examination papers at the end of Year 11. These are outlined below:

Component One: Changing Physical and Human Landscapes.

The topics for this paper are:

- Landscapes and Physical processes
- Rural-Urban Links
- Tectonic landscapes and Coastal Hazards

Component Two: Environmental and Developmental Issues.

The themes for this paper are:

- Weather, Climate and Ecosystems
- Development and Resource Issues
- Environmental Challenges

Component Three: Applied Fieldwork Enquiry

Students will complete two pieces of fieldwork in contrasting areas to develop critical enquiry skills. Throughout all of the units, there will also be opportunities to develop their cartographical, statistical and graphical skills.

Component One: One exam (worth 35% of the qualification) available in one tier.

Component Two: One exam (worth 35% of the qualification) available in one tier.

Component Three: One exam (worth 30% of the qualification) available in one tier.

Students will also complete a decision making exercise. The justification for their chosen decision will be assessed through one 12 mark extended writing question. Each exam will be 1 hour & 30 minutes.

HOW CAN STUDENTS ACCESS SUPPORT?

- You can support student understanding by encouraging them to watch or read the news on a regular basis. This will help them to stay abreast of current contemporary issues and compound understanding.
- Regular, chunked revision can be accessed via the Google Classroom as well as through YouTube channels such as 'Five Minute Geography Lessons'.
- A knowledge checklist can be found on Google Classroom in the Revision folder. This can be used to self assess areas that students need to improve in.
- Students are welcome to speak to any member of the department and can arrange to stay after school as needed.

HEALTH & SOCIAL CARE

Head of Department:	Mrs L Egerton
Exam Board	OCR
Qualification:	Cambridge National Technical Award in Health and Social Care

PROGRAMME OF STUDY

This is a vocational qualification so everything you learn about will be linked to real jobs and scenarios in health and social care. Throughout the course you will learn some of the main values that are used by care practitioners and how they are applied within Health, Social Care and Early Years settings. This course will give you background knowledge that you need to succeed and will help you develop the skills to work in the health and social care industry.

Unit R032: Principles of care in health and social care settings

In this unit, students will learn about the importance of the rights of service users, person-centred values and how to apply them. Students will also learn about the importance of effective communication skills when providing care and support for individuals using care settings and the procedures and measures used to protect service users and service providers such as safeguarding, hygiene and security.

Topic 1 – The rights of service users in health and social care settings

Topic 2 – Person-centred values

Topic 3 – Effective communication in health and social care settings

Topic 4 – Protecting service users and service providers in health and social care settings.

Unit R033: Supporting Individuals through life events

In this unit, students will learn about life stages and the factors that affect them. They will understand expected and unexpected life events and the impact they will have on physical, social/emotional and socio-economic aspects in an individual's life. Students will research the service providers and practitioners that can support individuals, recommend support and justify how this will meet the needs of a specific individual.

Topic 1 – Life Stages

Topic 2 – Impact of life events

Topic 3 – Sources of support

Unit R035: Health Promotion Campaigns

In this unit, students will have the opportunity to explore the various public health challenges the country faces, the approaches used to encourage health and wellbeing and the importance of this to society. They will understand the factors affecting a healthy lifestyle so that campaigns can be designed to target different

groups of people. Students will also learn how to plan and deliver their own small-scale health promotion campaign and how to evaluate their planning and delivery.

Topic 1 – Current public health issues and the impact on society

Topic 2 – Factors influencing health

Topic 3 – Health promotion campaigns

HOW IS THE COURSE STRUCTURED & ASSESSED?

The OCR Cambridge National Technical Award in Health and Social Care is run over two years and content is broken down into 3 units. Each unit is worth a specific number of points and, to successfully complete the course, students must complete each unit to the required minimum standard.

Unit R032: Principles of Care in Health and Social Care Settings externally assessed. This will be a written examination consisting of a 1hr 15minutes paper. You will take this in Year 11. It is worth 40% of the qualification.

Unit R033: Supporting Individuals through life events and Unit R035: Health Promotion Campaigns are assessed through coursework completion and this means that there is no final written examination for these units. Each of these units has a number of assignments to complete in order to fulfil the individual unit requirements.

HOW CAN STUDENTS ACCESS SUPPORT?

- To support your son/daughter at home you could proofread coursework, test them when they are revising and discuss what they have been learning in class and share your own experiences within health and social care.
- External Websites = <https://www.nhs.uk/>, <https://www.peoplefirstinfo.org.uk/health-and-well-being/>, <https://www.bbc.co.uk/bitesize/topics/zkdqhyhyc>, <https://www.bbc.co.uk/bitesize/topics/zpsv9j6>
- Google Classroom - supporting documents including writing frames and guidance to support students to complete coursework and to aid revision for the Component 3 exam.
- Every Monday and Thursday 3-4pm in VO1 we run a coursework catchup session / revision session, to support students with the current component they are working on.

Head of Department:	Ms. H. Stoneley
Exam Board	Edexcel
Qualification:	GCSE in History

PROGRAMME OF STUDY

History allows students to gain knowledge and understanding of the world in which they live today. Topics are chosen for their relevance to modern society and links to events taking place all around the world. History encourages students to think independently, to ask questions and make judgments. History students train their minds to assemble, organise and present facts and opinions.

Students will encounter a variety of teaching techniques from discussion and debate to group work and personal reflection. They will also see the subject brought to life through ICT and authentic footage. Students will have opportunities to take part in extra-curricular activities.

HOW IS THE COURSE STRUCTURED & ASSESSED?

The GCSE History course is divided into four units that will all be assessed through three examinations at the end of year 11.

Paper 1: British Thematic Study with Historic Environment Medicine in Britain, c1250 – present

Medicine in medieval Britain, the Medical Renaissance in England, the extent of change in care and treatment c1800 – c1900. medicine in Modern Britain.

Historic Environment Study

The British sector of the Western Front: injuries, treatment and the trenches

Paper 2: British Depth Study and Period Study

British Depth Study – Early Elizabethan England, 1558 - 1588

The situation regarding Elizabeth's accession to the throne, plots and revolts at home, the Spanish Armada and changes to Elizabethan society.

Period Study – Super Power Relations and the Cold War, 1941-1991

The origins of the Cold War, 1941-58; Cold War Crises, 1958-1970 and The end of the Cold War, 1970-91.

Paper 3: Modern Depth Study

The USA, 1954 – 75: conflict at home and abroad

The development of the civil rights movement, 1954 – 60, peaceful protests and their impact, Malcolm X and the Black Power movement, US involvement in the Vietnam War, reasons for the failure of the USA in Vietnam.

The three externally examined units will be sat at the end of Year 11. Paper 1 is worth 30% of the qualification through a written examination of 1 hour and 15 minutes. Paper 2 is worth 40% and is a written examination of 1 hour and 45 minutes. Finally, Paper 3 is worth 30% and is a written examination of 1 hour and 20 minutes.

These exams all require students to develop their extended writing skills, and in this respect History can be as challenging as English. As well as being assessed on specific historical knowledge, students will be expected to use their literacy skills to produce a high standard of written communication. Source analysis skills are essential and students will be taught to rigorously evaluate evidence to form a reasoned judgement.

HOW CAN STUDENTS ACCESS SUPPORT?

A knowledge checklist can be found on Google Classroom in the Revision folder.

This can be used to self assess areas that students need to improve in.

All students have access to the Seneca learning website where they can complete revision tasks and quizzes. Students are welcome to speak to any member of the department and can arrange to stay after school as needed.

<https://senecalearning.com/en-GB>

HOSPITALITY & CATERING

Head of Department:	Mr J Griffiths
Exam Board	WJEC
Qualification:	BTEC Tech Award in Hospitality & Catering Level 2

PROGRAMME OF STUDY

This course is aimed at preparing students for Hospitality, Catering and Food Science and Nutrition courses at Level 3 and beyond. This course will develop the skills and knowledge required to prepare students for a career in the catering and hospitality sectors, including all businesses that provide food, beverages, and/or accommodation services. This includes restaurants, hotels, pubs and bars. It also includes airlines, tourist attractions, hospitals and sports venues: businesses where hospitality and catering is not their primary service but is increasingly important to their success.

HOW IS THE COURSE STRUCTURED & ASSESSED?

The Level 2 Certificate in Hospitality & Catering a two year course with content broken down into units; this course is made up of two units of work.

Unit 1: is a task which is a 90 minute online / written external examination focusing on the Hospitality and Catering Industry. This examination contains short and extended answer questions based around applied situations. Students will be required to use stimulus material presented in different formats to respond to questions.

Unit 2: is a written assignment and practical examination based on Hospitality and Catering in Action.

Within this assignment tasks will be completed to **PASS, MERIT or DISTINCTION** level; this work will be set and marked internally. Students apply their learning to safely prepare, cook and present nutritional dishes. They will draw on their learning about different types of provision, kitchen and front of house operations in Unit 1, as well as personal safety in their food preparations. This task involves 10 hours under supervised conditions, 7 hours on the written assignment and 3 hours practical exam to produce a two course nutritional balanced meal which will be set and moderated by the exam board.

HOW CAN STUDENTS ACCESS SUPPORT?

- Resources are posted on Google Classroom on a regular basis and students can access this from home to again complete coursework or help support the current theory topic.
- Series of revision lessons and guides

INFORMATION AND COMMUNICATIONS TECHNOLOGY

Head of Department:	Mrs V Dougherty
Exam Board	WJEC
Qualification:	Vocational Award in ICT

PROGRAMME OF STUDY

The Vocational Award in ICT will develop students' knowledge and understanding of the ICT sector and provide them with opportunities to develop associated practical skills. It covers ICT in Society; allowing learners to explore the wide range of uses of hardware, application and specialist software, and ICT in context; introducing learners to a broad working knowledge of databases, spreadsheets, automated documents and images.

HOW IS THE COURSE STRUCTURED & ASSESSED?

The WJEC Vocational Award in ICT is comprised of two main units

Unit 1: ICT in Society

On-screen examination: 1 hour 20 minutes

40% of qualification

This unit allows learners to explore the wide range of uses of hardware, application and specialist software in society. Learners will investigate how information technology is used in a range of contexts, including business and organisations, education and home use of information technology.

Unit 2: ICT in Context

Controlled assessment: 40 hours

60% of qualification

This introduces learners to a broad working knowledge of databases, spreadsheets, automated documents and images and enables learners to apply their knowledge and understanding to solve problems in vocational settings

HOW CAN STUDENTS ACCESS SUPPORT?

- Revision can be accessed via Google Classroom and each student has a copy of the checklist and marksheet guide to support them.

MATHEMATICS

Head of Department:	Miss E Daniels
Exam Board	Edexcel
Qualification:	GCSE in Mathematics

PROGRAMME OF STUDY

We use mathematics to explain and understand the world we live in and to make predictions about what will happen in the future. Mathematics is a problem-solving tool that allows us to develop an understanding of all things in the world in which we live.

Students will continue to build on the skills learnt at Key Stage 3, covering number, algebra, shape and space and handling data in more detail.

Students will learn new skills and techniques in these areas, and then apply them in practical situations to see how mathematics solves real life problems. There is now a much greater emphasis in the assessment of mathematics in its use in real life scenarios.

HOW IS THE COURSE STRUCTURED & ASSESSED?

We follow a five-year plan to provide full coverage of the curriculum to ensure the best possible progress is made. All students will be entered for their Mathematics GCSE at the end of Year 11, as we follow a linear specification.

There are two main ways that students' work is assessed:

a) Internally – Mathematics teachers feed back to students on their progress by marking homework, mock assessments and offering supportive advice in preparation for examinations. Classes contain small numbers to facilitate targeted support in key areas. This support will help students to achieve their target grade in mathematics.

b) Externally – students will sit a full GCSE examination at the end of Year 11. There are three 1 hour 30 minutes assessments, all carrying equal weighting. Paper 1 will be a non-calculator exam. Papers 2 & 3 will require a scientific calculator.

Students will be entered at either Higher or Foundation Tier in line with the new grading system: Higher Tier (9, 8, 7, 6, 5, 4) or Foundation Tier (5, 4, 3, 2, 1) based on their performance and teacher assessment.

HOW CAN STUDENTS ACCESS SUPPORT?

- Google classroom has past papers and mark schemes for students to practice the exam style questions. The mark schemes will encourage students to be confident in marking their own answers so they become familiar with what is expected in each answer. Google Classroom also includes set tasks and support documents to help students and revise
- All students have access to sparxmaths (<https://www.sparxmaths.uk>). This website includes revision videos, quizzes to assess knowledge in particular areas and other facilities to revise.
- Students can also use onmaths.com. This allows students to complete online past papers which are automatically marked as they complete the questions.
- The department provides a drop session on Monday after school to help students with areas they would like more support with.

Head of Department:	Mr P Faithful
Exam Board	Edexcel
Qualification:	BTEC Tech Award in Music Practice

PROGRAMME OF STUDY

This qualification is for learners interested in taking a hands-on course alongside their GCSEs that will offer them an insight into what it is like to work in the Music sector – a vibrant, exciting and competitive industry that offers many different and exciting new work opportunities, whether in composing, performing, or producing music.

This course allows learners to explore the sector, and to learn and try out new skills, techniques and styles, allowing them to make an informed decision about their future learning and career. The course gives learners an opportunity to explore music in a practical setting and to develop understanding of the techniques used to create and realise music.

They will explore a variety of musical styles and the musical theory and techniques that underpin them and develop technical and practical skills through workshops and classes. In addition, learners will develop transferable and employability skills such as responding to a brief, self-development, planning, time management and communication.

HOW IS THE COURSE STRUCTURED & ASSESSED?

As a creative subject with a focus on music practice, there is no written exam. All components, including the externally assessed synoptic component, are assessed through engaging, open, and flexible set tasks, designed to give learners as much freedom as possible in how they respond, allowing them to work to their own strengths and interests, and to focus on the area of the music sector that most excites and appeals to them.

Component 1: Exploring Music Products and Styles

Learners will explore the techniques used in the creation of different musical products and investigate the key features of different musical styles.

Component 2: Music Skills Development

Learners will have the opportunity to develop two musical disciplines through engagement in practical tasks, while documenting their progress and planning for further improvement.

Component 3: Responding to a Music Brief

Learners will be given the opportunity to develop and present music in response to a given music brief.

All components are assessed through the production of a live performance and written portfolio work.

Work completed for Components 1 and 2 will be marked and assessed internally and covers the full range of activities, including the performance and supporting written portfolio work.

All work completed for Component 3 will be set by the exam board in the form of a pre-released brief and externally assessed.

HOW CAN STUDENTS ACCESS SUPPORT?

- General revision exercises, worksheets and course content for the Unit 1 exam can be found within the department's Google Classroom workspace.
- For their Managing a Music Product (Podcasting, Unit 2) and Music Sequencing (Unit 7) elements, students will be able to use the online Soundtrap and/or Bandlab software platforms to create, revise and refine their own creative compositions to a professional standard.
- The department is open for Y11 students to complete and develop coursework skills using the technology during our after school clubs, Mondays, Wednesdays and Thursdays.

PERFORMING ARTS - ACTING

Head of Department:	Mrs A Keen
Exam Board	Edexcel
Qualification:	BTEC Level 2 Tech Award in Performing Arts (Acting)

PROGRAMME OF STUDY

Throughout the course, students will become a member of a theatre company, devising and rehearsing performance material for a live audience. The course is a vocational course and as such it is designed to develop knowledge and understanding of the Performing Arts sector by applying skills during performance. Students will study the following three components over a period of two years:

Component 1: Exploring the Performing Arts

This component is designed to give an overview of what it is like to work in the performing arts industry. Students will explore performance styles, creative intentions and purpose. They will also investigate how practitioners create and influence what is performed. They will discover performance roles, skills, techniques and processes.

Component 2: Develop Skills and Techniques in the Performing Arts

In this component students will take part in workshops and rehearsals of existing work, and reflect on the whole process and explore where their talents lie.

Component 3: Performing to a Brief

Students will respond to the provided brief, using previous knowledge to develop performance material. This component is designed to draw upon the knowledge acquired in Components 1 and 2 and as such should showcase skills. Students will develop and perform a piece of theatre to a selected audience and will be required to reflect on the work created. This unit is set and assessed by the exam board.

HOW IS THE COURSE STRUCTURED & ASSESSED?

The BTEC Level 2 Tech Award in Performing Arts (Acting) is run over two years and the content is broken down into three components. Points are awarded for each component based upon the final grade obtained for each one. Students must complete all three components in order to achieve the required amount of points.

Component 1: Internally assessed unit. 30% of the total course grade.

Component 2: Internally assessed unit. 30% of the total course grade.

Component 3: Externally set task. 40% of the total course grade.

All components are assessed through the production of a live performance and written portfolio work.

All work completed for Component 3 will be set by the exam board in the form of a pre-released brief and externally assessed. Work completed for Components 1 and 2 will be set by the exam board by a pre-released theme. These components will be marked and assessed internally and cover the full range of activities, including the performance and supporting written portfolio. All work is externally moderated.

HOW CAN STUDENTS ACCESS SUPPORT?

- Parents can support students at home by encouraging them to read additional plays, help learn lines and rehearse performance work.
- Watching live theatre is hugely beneficial, if you can't visit the theatre in person there are lots available online.
- Google Classroom material is available to help support both written and practical work.
- Drama KS4 drop in is available for Year 11 students to attend every Wednesday after school. This can be used to catch-up on written work, to rehearse performance work or speak to staff.

PERFORMING ARTS - DANCE

Head of Department:	Mrs C Hickey
Exam Board	Edexcel
Qualification:	BTEC Level 2 Tech Award in Performing Arts (Dance)

PROGRAMME OF STUDY

Throughout this course, students will explore different dance genres, practitioners and professional dance works. Students will be expected to choreograph, rehearse and perform for a live audience. This is a vocational course and is designed to develop knowledge and understanding of the Performing Arts. Students will follow three components over a period of two years:

Component 1: Exploring the Performing Arts

This component is designed to give a synopsis of what it's like to be a professional dancer in the Performing Arts industry. Students will explore performance styles, creative intentions and purpose. Students will discover performance roles, skills, techniques and processes. The work will culminate in a final performance, with a written log to support all practical work.

Component 2: Developing Skills and Techniques in the Performing Arts.

In this component students will develop skills and techniques in the chosen discipline of dance. Over the course of the two years students will take part in workshops, classes and rehearsals, gain physical, interpretative, and rehearsal skills and apply these in the performance work. Students will be asked to reflect on progress, performance and how dance work can be improved.

Component 3: Performing to a Brief

In this component the students' work is set and assessed by the examination board. Students will build on previous knowledge and understanding to develop the performance material. This component is designed to draw upon the information acquired in components 1 and 2, based on the skills and techniques in the Performing Arts. St Mary's Dancers will get the opportunity to perform at the Floral Pavilion, featuring in the chorus and main cast of school productions. Competitions, performances in local schools and residential experiences abroad and at home are all part of the annual dance programme and students are encouraged to visit theatres to see professional dance.

HOW IS THE COURSE STRUCTURED & ASSESSED?

The BTEC Level 2 Tech Award in Performing Arts (Dance) is run over two years and the content is broken down into three components. Points are awarded for each component based upon the final grade obtained for each one. Students must complete all three components in order to achieve the required amount of points.

Component 1: Internally assessed unit. 30% of the total course grade.

Component 2: Internally assessed unit. 30% of the total course grade.

Component 3: Externally set task. 40% of the total course grade.

All work completed for Component 3 will be set by the exam board in the form of a pre-released brief and externally assessed. Work completed for Components 1 and 2 will be set by the exam board by a pre-released theme. These components will be marked and assessed internally and cover the full range of activities, including the performance and supporting written portfolio. All work is externally moderated.

HOW CAN STUDENTS ACCESS SUPPORT?

- Parents can support their son/daughter by attending local theatres and watching live dance.
- YouTube is a great source for watching dance, put in the style of dance and the choreography list is endless.
- Support can be found on Google Classroom, where teaching resources, lessons and homework is located.
- Dance insists on students taking part in extracurricular activities. Students will be expected to perform and choreograph in school shows, dance festivals, mass, celebrations and whole school celebrations. Theatre visits and residential at home and abroad will be run allowing students to take part in workshops and watch professional dance works.

PSYCHOLOGY

Head of Department:	Mrs L Egerton
Exam Board	OCR
Qualification:	GCSE Psychology

PROGRAMME OF STUDY

GCSE Psychology will provide students with an understanding of human behaviour. The programme covers five core areas Biological, Cognitive, Social, Developmental and Individual differences in a range of different topics including memory, social influence, criminal psychology and sleep and dreaming. Students will develop their skills in short answer questions and extended writing where they will be expected to analyse research and draw conclusions to the research whilst then evaluating the advantages and disadvantages of research. Students will use their mathematical ability to explain research methods and evaluate the different methods that psychologists use to test their theories. Students will complete 2 exams at the end of the 2 years.

HOW IS THE COURSE STRUCTURED & ASSESSED?

Students will complete two 90 minute exams both worth 50% each to make up the final GCSE grade

Paper 1: Studies and applications in psychology 1

Students will explore the following topics:

Criminal psychology including the different types of crime committed, deviation from social norms, theories of criminality and rehabilitation.

Development including stages of development, Piaget's theory of development and how they apply to education.

Psychological problems including and introduction to mental health, the role of stigma, schizophrenia and clinical depression and the treatments of mental health both biological and psychological.

Students will complete a section on Research Methods which cover all the types of methods used to investigate theories and their advantages and disadvantages. This section will focus on designing an investigation.

Paper 2: Studies and applications in psychology 2

Students will explore the following topics:

Social influence including conformity, obedience and the effect of situational factors on our behaviour as well as how minority influence leads to social change.

Memory including information processing, the multi store model and the use of cues and repetition.

Sleep and dreaming including the benefits of sleep, Freudian theory of dreaming, features of insomnia and treatment.

Students will complete a second section on Research methods this time the research methods relate to a novel source.

HOW CAN STUDENTS ACCESS SUPPORT?

Revision can be accessed via Google Classroom and each student has a copy of the revision guide to support them.

RELIGIOUS EDUCATION

Head of Department:	Mrs M Wilson
Exam Board	EDUQAS/WJEC
Qualification:	GCSE in Religious Studies

PROGRAMME OF STUDY

The Religious Studies GCSE will develop students' knowledge and understanding of religious beliefs, teachings and practices. They will focus on Catholic beliefs but also compare them to non-religious beliefs such as humanism and atheism. Students will develop the skills to construct a well informed and balanced argument including their own beliefs and questions. Students will be given the opportunity to reflect on their own values and how they can contribute to the local and global community.

HOW IS THE COURSE STRUCTURED & ASSESSED?

The course consists of three externally examined units. Students will be examined on the course at the end of Year 11. Papers 1 and 2 are both 1 hour 30 minutes and worth 90 marks each. Paper 3 is 1 hour and is worth 60 marks.

Paper 1: Foundational Catholic Theology – 37.5% of overall mark

Origins and Meaning: Students will study the different creation accounts and evaluate their importance. They will analyse different forms of art work showing God's creation and understand how Religion and Science can work together. Good and Evil: Students will debate the problem of evil and suffering in the world alongside the existence of God. They will evaluate different philosophical responses and form their own views.

Paper 2: Applied Catholic Theology– 37.5% of overall mark

Life and Death: Students will study the Catholic Beliefs on life and death and how these beliefs impact on society. They will link their own beliefs to Bible teachings, modern day art work and moral issues.

Sin and Forgiveness: Students will study the difference between crime and sin and the different forms of punishment in the legal system. They will evaluate the importance of forgiveness and redemption for Catholics.

Paper 3: Judaism - 25% of overall mark

Students will study Judaism with a focus on the nature of God, worship and practices, and daily life.

HOW CAN STUDENTS ACCESS SUPPORT?

- Google classroom has past papers and mark schemes for students to practice the exam style questions. The mark schemes will encourage students to be confident in marking their own answers so they become familiar with what is expected in each answer.
- Students will receive a revision pack in October. This will have a revision booklet for each of the papers so that all of their revision notes are in one place. They will have opportunities in class to build on this using different techniques such as revision frames, cue cards, mind maps and revision clocks.
- Revision powerpoints and frames are also available on Google classroom to help students structure chunks of content and recap the units they have studied over the GCSE course
- <https://www.YouTube.com/c/MrMcMillanREvis> is an excellent YouTube site to use as it covers all the units we have studied in small video revision clips covering content, quotes and teachings and different revision strategies
- On Thursday evenings there are RE revision sessions from 3.00-4.00pm where students will have the opportunity to work with their teacher looking at the structure of exam questions and also revision strategies to help them feel prepared.

SCIENCE COMBINED

Head of Department:	Mrs V Brown
Exam Board	AQA
Qualification:	Two GCSEs in Combined Science

PROGRAMME OF STUDY

Combined Science is studied as part of the Core Curriculum and as such is a compulsory subject.

Students will study Biology, Chemistry and Physics. They will learn about topics including human biology and evolution, where raw materials come from and about the universe. There is great emphasis on learning to become responsible citizens, looking after our planet and understanding the implications of being wasteful with our resources. Students will spend time investigating issues relating to the topics in a practical way, where appropriate.

HOW IS THE COURSE STRUCTURED & ASSESSED?

Students will sit all their examinations in the June examination series at the end of Year 11.

Students will sit six examinations at the end of Year 11. Each examination contributes 16.7% of the final GCSE grades for Combined Science.

There will be:

- two Biology papers
- two Chemistry papers
- two Physics papers

Unlike the previous GCSE science courses, there will be no Individual Skills Assignments (ISA – controlled assessment). Thus, students will complete practical assignments throughout the course and their understanding and application of these practicals will be assessed within the final GCSE examinations.

HOW CAN STUDENTS ACCESS SUPPORT?

40% of GCSE combined science assesses students knowledge and understanding of the course. The best support that you can give your child is to help them in regularly practising the factual content of the course, such as physics equations. Support materials such as CGP revision guides and CGP revision cards are available to purchase in school.

- A wide range of appropriate resources can be found on https://www.cgpbooks.co.uk/secondary-books/gcse/science?sort=best_selling&quantity=36&page=1&view=grid¤tFilter=SyllabusType_887&filter_exam%20board=ExamBoard_140&filter_course%20or%20syllabus%20type=SyllabusType_887
- YouTuber “Free science lessons” found at https://www.YouTube.com/channel/UCqbOeHaAUXw9II7sBVG3_
- bw present short videos covering the entire GCSE course in an easy to understand and concise manner
- Google classrooms have practice exam papers and markschemes uploaded onto them, along with any work that has been uploaded or completed over the course of the year.
- Students are welcome to attend biology, chemistry and physics revision sessions on a Friday to help support their learning.

SCIENCE TRIPLE (BIOLOGY, CHEMISTRY, PHYSICS)

Head of Department:	Mrs V Brown
Exam Board	AQA
Qualification:	A GCSE in each of Biology, Chemistry and Physics

PROGRAMME OF STUDY

Students will study separate GCSEs in Biology, Chemistry and Physics and therefore receive a GCSE for each of the three sciences.

In Biology, students will learn about a range of topics including the transport of substances in plants and animals and using micro-organisms to produce food and fuels.

In Chemistry, students will learn about topics including the development of the Periodic Table, what makes acids and alkalis acidic and alkaline and how to calculate the energy in various chemical reactions.

In Physics, students will learn about topics including how planets, moons and satellites remain in orbit and the effect prisms and lenses have on light.

HOW IS THE COURSE STRUCTURED & ASSESSED?

Students will sit all their examinations in the June examination series at the end of Year 11. Students will sit six examinations at the end of Year 11.

Each examination contributes 50% of the final GCSE grades for each of the three separate science subjects. There will be:

- two Biology papers leading to the Biology GCSE
- two Chemistry papers leading to the Chemistry GCSE
- two Physics papers leading to the Physics GCSE

Unlike the previous GCSE science courses, there will be no Individual Skills Assignments (ISA – controlled assessment). Thus, students will complete practical assignments throughout the course and their understanding and application of these practicals will be assessed within the final GCSE examinations.

HOW CAN STUDENTS ACCESS SUPPORT?

40% of GCSE triple science assesses students knowledge and understanding of the course. The best support that you can give your child is to help them in regularly practising the factual content of the course, such as physics equations. Support materials such as CGP revision guides and CGP revision cards are available to purchase in school.

- A wide range of appropriate resources can be found on https://www.cgpbooks.co.uk/secondary-books/gcse/science?sort=best_selling&quantity=36&page=1&view=grid¤tFilter=SyllabusType_887&filter_exam%20board=ExamBoard_140&filter_course%20or%20syllabus%20type=SyllabusType_887
- YouTuber “Free science lessons” found at https://www.YouTube.com/channel/UCqbOeHaUXw9II7sBVG3_
- bw present short videos covering all three GCSE courses in an easy to understand and concise manner
- Google classrooms have practice exam papers and markschemes uploaded onto them, along with any work that has been uploaded or completed over the course of the year.
- Students are welcome to attend biology, chemistry and physics revision sessions on a Friday to help support their learning..

SPORTS STUDIES

Head of Department:	Mrs N Lam
Exam Board	WJEC
Qualification:	Level 2 Vocational Award in Sport and Coaching Principles

PROGRAMME OF STUDY

The qualification is centred around sports coaching and focuses on:

- Improving your own and others performance
- How to assess needs and identify actions plans to develop physical fitness for sport or health
- How to coach different groups with different needs

During the course you will:

- Develop knowledge and understanding of the factors that underpin physical activity and sport
- Use this knowledge to improve performance
- Understand how the physiological state can affect performance in physical activity and sport
- Understand the contribution which physical activity and sport make to health, fitness and well-being
- Demonstrate knowledge and understanding of the skills and techniques needed for successful coaching
- Demonstrate how to plan, organise and communicate effectively
- Demonstrate creativity and innovation

HOW IS THE COURSE STRUCTURED & ASSESSED?

The course is run over two years and content is broken down into units. Each unit is worth a specific amount of points and to successfully complete the course, students must complete each unit to the required minimum standard. Students must complete the selected three units in order to achieve the required amount of points. The content of the course is delivered practically where possible, but there will also be a significant number of theory based lessons.

The course is assessed in 3 units:

Unit 1: :Fitness for Sport (Online Exam 90 mins – 90 Marks 40%)

Unit 2: Improving Sporting Performance (coursework 30%)

Unit 3: Coaching Principles (coursework tasks 30%)

You will be given a points score for each unit and these scores will be totalled and the final grade awarded ranging from Level 1 pass through to distinction*.

WHAT CAN THESE QUALIFICATIONS LEAD TO?

Students will be encouraged to support the St Mary's extra-curricular programme, in order to develop their coaching experience. There will also be after school support available for coursework completion.

Additional resources will be posted on the Google classroom in addition to the use of the everlearner programme, where students will be issued with an individual login where they can personalise their revision according to the individual gaps in their learning
